DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. Information Disclosure Statement submitted on 8/27/03 has been considered by the examiner.

Drawings

3. Drawings filed 8/27/03 have been approved by the examiner.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance:

Claims 1-22 are allowed.

The present invention is directed of estimating skew angle in a document image.

None of the prior art on record teaches or suggests determining an erosion of the run-length-smoothed image by a linear structuring element oriented at each of a plurality of different angles, so as to determine the angle at which a surface area of the eroded image is maximum, the angle being designated as the skew angle of the document image as required by independent claims 1, 11 and 22. Desari et al. disclose a system for automatically determining and correcting the orientation of an image for document processing that is 90 degrees or 180 degrees out of alignment. Desari et al. fails for determining an erosion of the run-length-smoothed image by a linear structuring element oriented at each of a plurality of different angles, so as to determine the angle

at which a surface area of the eroded image is maximum, the angle being designated as the skew angle of the document image.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other prior art cited

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bloomberg et al. (US 5,201,011) disclose a method and apparatus hand markup detection using morphological techniques.

Beeman et al. (US Pub. 2003/0190090 A1) disclose a system and method for digital-image enhancement.
